

# *Carton Print Inspect Unit*

## *Track & Trace / Serialization*

**With Track & Trace mandated deadlines approaching, Nutec Systems introduces a single point of data input system that can fulfill all your requirements in the span of 1 meter.**

The Carton Print Inspect Unit features a human interface which allows the end-user to input their product requirements into one system. This single entry system communicates with all components simultaneously, eliminating the need to program the product handling system, the printer and vision inspection system separately.

Serialized 2D Bar Code  
Lot & Expiration Date

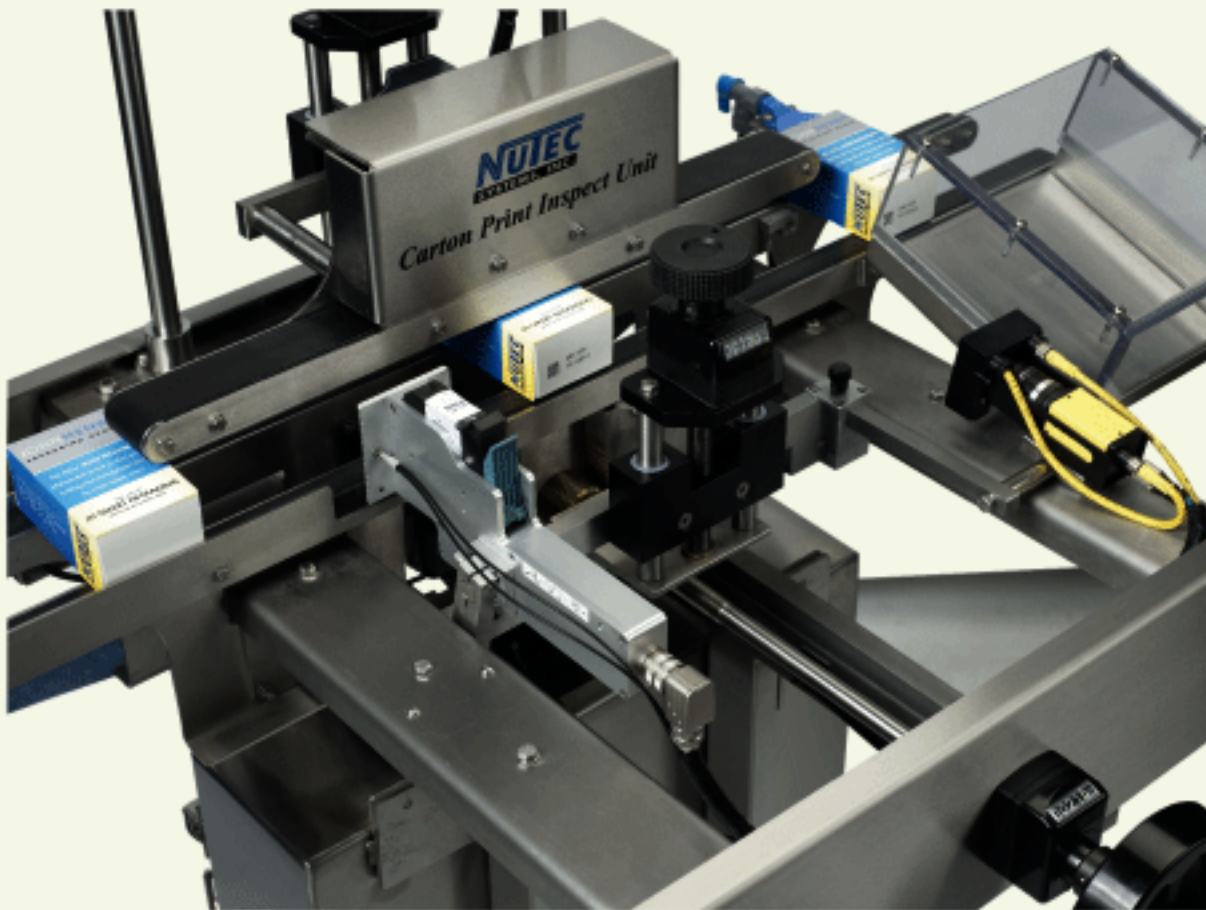

- System Expandable to Meet Existing and Future Track & Trace Requirements
- Complete Validation Available
- Sustained Compliance with Validation Backed Up To Durable Media
- Customized Version Available
